WONM-CHANCELLOR'S INVITATION

Dear Practitioner of the Natural Medicine:

We are pleased to announce the Princess of Kuwait, Her Royal Highness, as our chief guest along with many other official dignitaries for the opening of our grand first world congress in the Bahamas. The congress will be opened by many government dignitaries.

This is a most vital and exciting Congress for our cause, as it is the first time we make scene on political fronts for advancing our future. Our chairman and myself are busy at work on many political and international causes that will be announced at this congress. It is vital we have a strong representation of our members.

This is also the first congress that we will be merging affiliation with the Open International University-USA, heralded by our late, great mentor Sir Dr. Anton Jayasuriya. We thus anticipate representation from many parts of the US, Canada, Europe, South America, and Asia.

We have also decided to take opportunity to use our annual congresses for the presentation of accolades and give merit where merit is due. We all know how the world's press routinely ignores our cause and our champions. We can no longer sit the by sidelines. We will prevail. We have formed an affiliation with OIU and now have an awards committee. A form is enclosed if you have any nominees for our research editors to consider with full explanation.

We are also introducing our online examination for Basic Medical Sciences (<http://www.wonmp-casha.org/cw/openlist.asp>). Our Board and legal department have all concurred that self-examination of members is the only viable way forward on the world front to gain respectably of our various disciplines. I will be conducting some examination review seminars before (May 31) and during the congress to facilitate easy passage for all members required to complete this online process for 2006. This is a one-time opportunity. A registry fax form is enclosed.

We are also pleased to announce the formation of the BAHAMAS INTERNATIONAL REGISTRY of DOCTORS of NATURAL MEDICINE, Ltd. This is an autonomous, Caribbean organization, which integrates the registry of practitioners of all natural medicines and indigenous healing arts. Registry participation raises the status of and compensation for natural medicine practitioners as a viable and critical profession in our society. Participants to the annual congresses in Nassau may register annually at the Nassau office. Details will be posted soon on its new web site. You may submit your email address for posting at panamint@caribsurf.com

We are counting on your participation in Nassau this June.

Sincerely,

Hon. Prof. Charles McWilliams, Minister Plenipotentiary of International States Parliament for Safety and Peace
Knight Commander of Graace, The Sovereign Order of Knights Hospitaller of St. John of Jerusalem
